This lure is made with environmentally friendly material imported from Germany. The lure body is moderately soft, making it very realistic and appealing to fish.

It is also enhanced with a salt buoyancy material, providing a soft yet bite-resistant texture that's hard to tear.

The lure features built-in reflective flakes, which increases the chances of being spotted by big fish.

Furthermore, it is enhanced with a fish attractant to increase the fish-attracting effect when entering the water.

Aggressive Hammer Shrimp

Model Name
Aggressive Hammer Shrimp

Parameters
Qty/Pack

Mode
PVC Sinking Version
TPE Floating Version

The Aggressive Hammer Shrimp is available in two versions: the PVC sinking version and the TPE floating version. Its large pincers, possessing great buoyancy, enable them to stand in a natural defensive crayfish pose, tempting bass to attack.

- 1. Rattle Bead Chamber Design, equipped with an internal rattle chamber. The bait body produces noise as it swings, closely combining the swimming action and sound.
- 2. Soft Bait Body, made of imported PVC material, contains 7 types of materials, soft and bite-resistant, tear-resistant.
- 3. The tail is equipped with a hole position to better transmit the sound emitted by the rattle bead to target fish to attract attacks.
- 4. The bait body is embedded with amino acid particles, increases fish attraction, making it difficult for fish to spit out.
- 5. Contains laser reflector inside, realistically imitating the reflective effect of fish scales, greatly increasing the fish-attracting effect.
- 6. 9-color bait body design, adjust timely according to weather conditions. Use darker colors in turbid waters, lighter colors in clear waters, and brighter colors on cloudy or rainy days.

Rattle Bead Design

The bait body produces noise as it swings, closely combining the swimming action and sound. The tail swings, generating noise upon collision.

ORIGINAL COUNTERWEIGHT DESIGN, ADJUST COUNTERWEIGHT ACCORDING TO ENVIRONMENT
TAIL WAGGING, CLASHING SOUND

Added Hydrogen Particles

Precise dual-coloring process, the bait body is embedded with amino acid particles, increasing fish attraction, making it difficult for fish to spit out.

ORIGINAL COUNTERWEIGHT DESIGN, ADJUST COUNTERWEIGHT
TAIL WAGGING, CLASHING SOUND

Floating Aggressive Frog

TPE Material Added with
Amino Acid Attractants/Internal Rattle Bead

DESIGN:

- Produced with eco-friendly raw materials, pressure injection molding is used after a mature material process.
- The bait body is embedded with amino acid attractants, increasing fish attraction, making it difficult for fish to spit out.
- A dual-coloring process gives the bait good color presentation and improves environmental adaptability.
- Contains a laser reflector to simulate the reflective effect of fish scales.
- Suitable for various fishing methods, can be trolled with a crank handle hook, can be used as a tail of a tractor, creating large disturbances in the water.

Floating TPE Material Added with Amino Acid Attractants

Produced with eco-friendly TPE material. Tear-resistant, fragrance attracts fish, flexible and resilient.

The bait body is embedded with amino acid attractants, greatly increasing the fish-attracting effect, making it difficult for fish to spit out.

Built-in Dual Rattle Tubes

Exhaust Holes at the Tail

Better transmit the sound emitted by the rattle bead to the target fish, enticing them to attack.

Suitable for Various Fishing Methods

Can be trolled with a crank handle hook, can be used as a tail of a tractor, creating large disturbances.

It's suitable for fishing near grassy areas.

Product Description.

Bait Body Advantages

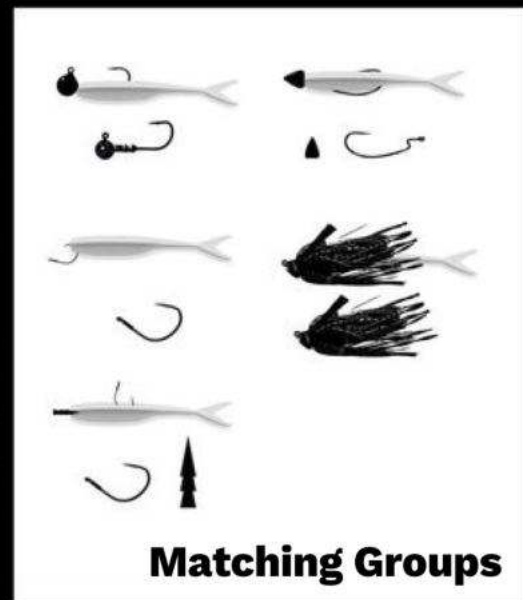

- 1.The slender forked tail creates subtle turbulence when it wiggles in the water, easily tempting fish to attack in high pressure and turbulent water conditions.
- 2.Amino acid particles are added to the bait body to increase the attractiveness to fish, making it hard to spit out.
- 3.Specially designed to attract target fish for lure fishing.

Fish Tail Advantages

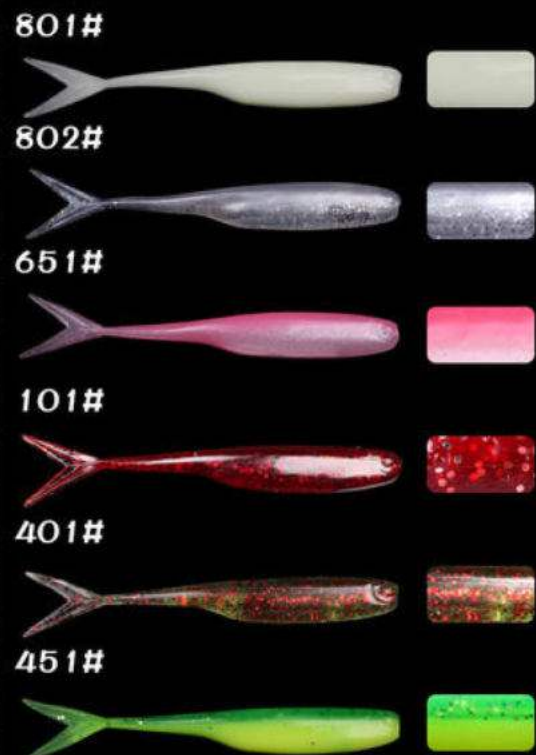

- 1.Biomimetic bait body design, realistically mimics the underwater state of the bait.
- 2.Increased thickness reduces bait damage.
- 3.The golden ratio of added salt, through multiple experiments, can achieve a natural sinking state.

- The bait is made from environmentally friendly materials, formed by pressurized casting using a mature material process.
- The double-color separation process gives the simulated bait a good color presentation, improving environmental adaptability.
- It contains laser reflective pieces to simulate the reflective effect of fish scales.
- Suitable for both fresh and sea water, searches all water layers.

Matching Groups

Threaded T-Tail

We use exported environmentally friendly materials and reject second-hand recycled materials. Amino acid particles are added to the bait body, which increases the attractiveness to fish, making it hard to spit out. The bait body is flexible, highly elastic, tear-resistant, easy to operate, and not easily torn by large fish. Its swimming posture is dynamic, and it provides a good bait control feel even with lead-free fishing gear. The bait body is plump and round, with the tail swinging in a large arc, the flirtatious swimming posture provokes attacks. The added fish attractant turns the bait into irresistible, delicious food in seconds.

These hook grooves on the back

The belly are designed for convenient hook hanging and hiding, reducing the alertness of target fish.

Product Details

- The bait is made from environmentally friendly materials, formed by pressurized casting using a mature material process.
- The dual-color separation technique gives the simulated bait a good color presentation, improving environmental adaptability.
- The threaded design creates water ripples when dragged, increasing the turbulence effect.
- The tail swings in a large arc, and its flirtatious swimming posture is attractive.
- It contains laser reflective pieces to simulate the reflective effect of fish scales.

PRODUCT SPECIFICATION

5-5CM 1-5G ■ 6-5CM 2-5G

Addition of Amino Acid Fish Attractant

Amino acid fish attractant is added to the bait body, increasing the attractiveness to fish and making it hard to spit out.

8 Color

FLOATING CRAW

Made from eco-friendly TPE (Thermoplastic Elastomer) materials, the bait is infused with amino acid granules to enhance its attractiveness to fish, making them less likely to spit it out.

It features high-vibration water-slicing tentacles. The tail has a broad, high-frequency wagging motion.

The bait is designed to float, has a textured surface, and features a groove design to conceal the hook tip, reducing the likelihood of getting snagged on the bottom.

It is versatile across various water conditions and is suitable for different fishing techniques, minimizing the chances of getting stuck on the bottom.

FISHING LURE

DESIGN BY HEDGEHOG FORCES

Dual search mode

providing more operational space and the freedom to switch according to fishing site conditions

1 Fast Search Mode

This mode enhances the ability to quickly search swimming layers. It is suitable for underwater areas and fishing for upper-middle layer target species.

2 Bouncing Bottom Mode

This mode has a natural amplitude and completely activates the dynamics of small baits. It is suitable for bouncing fishing in the water and directly hits deep-bottom target species.

The Bottom Anti-Collision Design

28G, 21G, 14G: effectively avoids problems such as paint peeling and deformation caused by bottom bumps. From left to right are: 28G, 21G, 14G.

The Anti-Hooking Soft Pipe Design

preventing the hook from getting stuck in the bait body, avoiding affecting the swimming posture

Improving search efficiency, and ensuring the hook rate.

Mustad Back Hook

The fish hook comes with a barb, which makes it difficult to unhook.

The hook is sharp, reducing the chance of fish

The Au Gold Triple Hook

Imported steel material, refined through several rounds of polishing, has strong toughness, a sharp hook point, and is not easily rusted or corroded.

The Lead Fish

It has a lethal allure, with a high bite rate.

It's a finely crafted piece with a provocative swimming posture.

70mm	70mm	85mm	95mm	95mm	95mm
10g	14g	17g	21g	28g	35g

- The fish body's head contains weighted lead pieces.
- Compared to steel balls, the sound is lighter and the effect is better.
- The bait body is soft, made from imported PVC material, it is bite-resistant and tear-resistant.
- The fish tail swings with a large radius, giving a provocative swimming posture.

LURE FISHING

LURE FISHING

THE HOOK IS PREVENTED FROM HANGING ON THE BAIT BODY, THE SWIMMING POSTURE IS AVOIDED, THE SEARCHING EFFICIENCY IS IMPROVED, AND THE HOOK RATE IS GUARANTEED

COMPARED WITH STEEL BALL
THE SOUND OF FISH HEAD IS LIGHTER AND THE EFFECT IS BETTER

VIBRATION

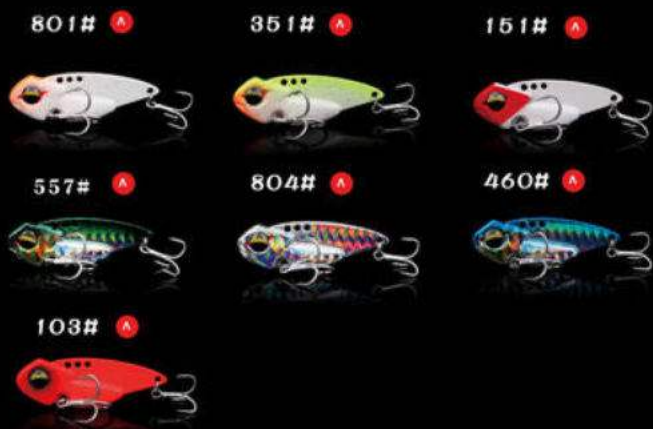

**Original Noise Design with In-built
Metal Bait Sound Tube**

- The fish body has a steel tube with sound beads inside. While the VIB (Vibration) is varying frequency, the sound bead will collide with the steel tube to produce low-frequency noise.
- This design realizes a combination of long-distance casting, varying frequency, and noise. The aggressive VIB body uses high-strength gold copper plates and high-density lead, making it more slender and stable compared to the traditional VIB.
- By pairing with different operation hole positions, it enhances the fishing performance of the simulated bait. The special design of the abdomen creates more fish-like disturbances, resulting in stronger responsiveness during operation. The overall center of gravity leans forward, and the 3D fish-eye design forms a lethal attraction to the target fish.

1. The fish body has a built-in steel tube with sound beads. When the VIB (Vibration) frequency changes, the sound bead will collide with the steel tube, producing a low-frequency noise. This design realizes a combination of long-distance casting, variable frequency, and noise.
2. The product is imported from Japan and has a special hot stamping process, which is highly reflective.
3. The 3D simulation fish eyes have a deadly temptation effect on fish.
4. The hooks are customized and tripled in strength, which ensures good piercing effects. The sharp barb structure reduces the chance of fish escaping.

Sharp Triple Hooks

Sharp and sturdy, these hooks have strong penetration and can decrease the rate of fish escape

Multiple Search Modes

1 Bottom-Jumping Mode

Natural swing, fully animating the dynamics of small baits, suitable for bouncing search in water, directly hitting deep water bottom target fish.

2 Fast Search Mode

The tail swings upwards, enabling quick elevation of search swimming layers. This is suitable for diving areas and searching for upper-layer target fish.

DESIGN BY HEDGEHOG FORCES

Model Name : Artificial Jig
Dynamic Mode : All Water Layers

Parameters

Size	42S	47S	51S	57S	65S
Weight	7G	10G	14G	21G	30G

Triple-reinforced custom hooks ensure good piercing effects, with sharp barbs designed to reduce the chance of losing the fish.

3D simulation fish eyes provide a deadly allure for fish.

Imported from Japan, the bait features a special hot stamping process that makes it highly reflective.

The asymmetrical design of the bait body allows it to maintain a flirty swimming posture, even when the fish's activity is low and slow searching is required. The bait's body has a built-in sound bead that, when drifting or falling, collides with the steel tube to create a low-frequency noise. This realization combines long-distance casting, noise, and falling posture into one design.

DESIGN MESSAGE

3D Fish Eyes

The design of large and bright fish eyes reflects light from various angles, reduces fish's vigilance, and increases the fish catch rate.

Multiple Search Modes

1 Bottom-Jumping Mode

The bait swings naturally and fully activates the small bait's dynamics. It is suitable for jumping and searching for fish in deep water layers.

2 Fast Search Mode

The tail swings upward like a rattlesnake, having the ability to quickly rise to search the water layers. It is suitable for diving areas and mid-to-upper layer fish species.

Sharp Three-Pronged Hooks

The hooks are sharp and robust with strong penetration power to reduce fish escape rate.

Silent Weight Lead

The lead block produces a lighter sound for a better effect.

Zero Distance Start-Up

The "Mandarin Duck" body is made of high-strength stainless steel, making it more slender compared to traditional VIB. By matching different operation slots, the fishing performance of the simulated bait is enhanced, and the overall center of gravity is moved backward, resulting in stronger start-up during operation.

CASTING X8

PE Powerful Horse Fishing Line

This fishing line is woven from imported raw silk, making it smooth and casting a far distance.

It's suitable for lure fishing, sea fishing, boat fishing, and more...

PRODUCT INFORMATION

Japanese Original Carbon Fluoride Line

50m/100m/130m/180m/200m

Invisible underwater, powerful pulling force

1. The line is soft and transparent, invisible underwater.
2. Super pulling force, high knot strength, effectively avoiding fish escaping.
3. Strong recovery, sturdy and wear-resistant, effectively preventing attacks from various underwater obstacles.
4. High sensitivity, its density and strength are lower than that of ordinary fishing lines, making it fast-cutting and suitable for casting.
5. Standard line diameter, does not absorb water when in it for a long time.
6. Parallel winding, good touch, does not harm the line, suitable for both fresh and sea water.
7. Suitable for main lines and leader lines, double resin construction, prolongs service life, resistant to ultraviolet rays, strong anti-oxidation capability.

Strengthened Lead Head Hook

- High strength carbon steel, high hardness not easy to bend
- Hook tip refined by skilled workmanship, high sharpness, rapid fish piercing
- Sharp barb, fish are not easy to escape after biting the hook
- High carbon hanger, smooth and does not damage the line, not easy to rust, sturdy and durable

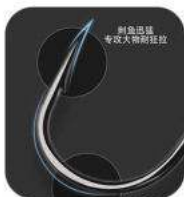

Number	2.5g	3.5g	5g	7g	10g	14g	20g
Length (mm)	2.7	3.0	3.3	3.8	4.1	4.5	4.8

Quantity/Pack	10	10	8	8	6	5	4

Threaded Lead Head Hook

- Strengthened carbon steel, sharp barbed hook tip
- Threaded lead head bottom probing, hook tip facing up to avoid snagging
- Integrated soft bait locking structure, firmly secures bait, not easy to lose bait
- Smooth line hanging area to prevent line wear leading to broken lines and escaped fish

Number	1#	1#	1/0	1/0	2/0
Weight (g)	3.5	5	7	10	14

Ned Lead Head Hook

- Widened hook gate, increases hooking rate, stronger pulling force
- Rounded hook tip craftsmanship, gently touching can pierce through fish's mouth
- Flat-top mushroom lead head, combined with soft bait standing in water, conspicuously attracting fish
- Delicate buckle, doesn't harm soft bait, baiting is more convenient and faster

Number	1#	1#	1#	1/0	1/0	1/0
Weight (g)	3	5	7	3	5	7

Fierce Knife Wide Belly Bent Handle Hook

- Multi-stage sharpening technology, distinct barbs
- Improved fish hook handle curve design, hook tip facing downwards to reduce snagging
- Flat-forging process for stronger tensile resistance
- Integrated bent handle, ringed handle, easy to tie, not easy to fall off

Number	Length (MM)	Width (MM)	Quantity/Pack
2/0	47.5	19	6
3/0	49	20.5	6
4/0	54	22.5	5

Ferocious Fang Wide Belly Bent Handle Hook

- Upgraded curved handle, strong corrosion resistance
- High carbon steel body, black nickel coating, sharp hook tip
- Integrated curved handle, ringed handle easy to tie, not easy to fall off
- Smooth threading hole, does not damage the line

Number	Length (MM)	Width (MM)	Quantity/Pack

2/0	41.5	17	7

Bullet Weights

- Made from high-density electrolytic lead material, ensuring a rapid sinking speed and heightened sensitivity.
- Cuts through the water effectively, ensuring accurate casting without easily getting snagged at the bottom.
- The through-hole has a smooth interior, preventing line damage.
- Pairs well with various soft baits, including shrimp-shaped, grub-shaped, and fish-shaped lures.

Weight	Quantity/Pack	Weight	Quantity/Pack
1.8	12	7	5
2.5	11	10	4
3.5	10	14	4
5	10	20	3

Inverted Fishing Weight - Spherical/Cylindrical

- Streamlined design ensures minimal water resistance and reduces the chance of snagging at the bottom
- Made from high-quality electrolytic lead that's smooth and won't damage the line
- Enhanced with a thickened and strengthened pin for greater weight-bearing capacity
- Finely crafted with no burrs, offering high strength and rust resistance

Weight	Quantity/Pack	Weight	Quantity/Pack
2.5	12	10	7
3.5	10	14	5
5	9	20	4
7	8		

Gourd-shaped Safety Pins

- Selected imported alloy steel, processed with new technology
- Safety design, high strength, good elasticity, not easy to fall off
- Excellent surface treatment, not easy to rust even after long-term use
- Stable performance, suitable for various methods of play

Number	Length (mm)	Tensile Strength (mm)	Quantity/Pack
0#	13	12	20
1#	15	18	20
2#	17	25	20

American Swivel Safety Pins

- American 8-shaped ring, sturdy texture, high sensitivity
- 360° rotation is smoother, with less resistance
- Thicker, reinforced safety pins for greater load-bearing
- Exquisite craftsmanship, no burrs, high strength, does not rust

Number	Length (mm)	Tensile Strength (mm)	Quantity/Pack
7#	25	18	16
8#	21	12	16
10#	20	12	16
12#	18	9	16

Round Head Root Fishing Hook

- This hook is made from electrolytic lead and 5T high carbon steel, featuring a sharp barbed hook tip.
- The smooth round lead head makes it ideal for bottom fishing and reduces the chance of getting snagged.
- It's equipped with a single hook imported from South Korea, ensuring durability and resistance to deformation.
- This hook is suitable for catching fish like sunfish, Chinese perch, and bass.

Number	6#	6#	6#
Weight (g)	0.9	1.8	3.5
Length (mm)	13	14	15
Width (mm)	7.5	7.5	7.5
Quantity/Pack	5	5	5

Fish Eye Root Fishing Hook

- This hook features a fish-like biomimetic design that simulates the escape of fish and shrimp.
- It's made of high-quality electrolytic lead with high density, allowing for quick submersion in water.
- The hook, imported from South Korea, has a sharp tip that makes it easier to hook fish.
- This hook is suitable for catching fish such as sunfish, Chinese perch, and bass.
